SUMMARY

Solana Blockchain Developer with experience building production-ready programs using Rust and Anchor. I have delivered secure and high-performance programs for DeFi, Web3 gaming, and custom client projects. I focus on best practices, testing, and long-term maintainability, and I'm motivated by building real-world blockchain products and continuously learning within the ecosystem.

EXPERIENCE

Solana Blockchain Developer

Oct 2025 - Present

Freelance

Remote

- Designed, developed, and deployed custom Solana programs using Rust and Anchor for different clients and use cases
- Built DeFi-related logic, token-based systems, and program integrations based on client requirements
- Delivered production-ready programs with a strong focus on security, performance, and best practices
- Performed testing, auditing, and code reviews to reduce risks and ensure long-term maintainability
- Integrated Solana programs with backend and frontend systems when required
- Worked directly with clients to understand requirements, propose solutions, and deliver on time

Solana Blockchain Developer

Apr 2023 - Oct 2025

Inside Dark Studio

Remote

- Designed, developed, and deployed production-ready Solana programs using Rust and Anchor for DeFi, RWA, and Web3 gaming projects
- Shipped secure and high-performance programs used in real client products
- Implemented integration and fuzz testing to improve reliability and reduce production issues
- Integrated on-chain programs with backend and frontend systems to enable complete end-to-end workflows
- Managed AWS infrastructure to support scalable and stable deployments
- Followed best practices to ensure security, performance, and long-term maintainability

Full Stack Blockchain Developer

Oct 2022 - Apr 2023

OPIS EcoWallet

Remote

- Developed the main web application and integrated it with blockchain smart contracts
- Designed and implemented full-stack architecture using Next.js, Node.js, and blockchain libraries
- Managed AWS services to support deployment and application stability
- Collaborated with the team to successfully deliver and launch the project MVP
- Ensured smooth interaction between frontend, backend, and blockchain layers

Full Stack Web Developer

Ago 2021 - Ago 2022

Freelance

Remote

- Designed and developed multiple production web applications for different clients
- Built landing pages, dynamic platforms, and e-commerce solutions using React/Next.js, Node.js and SQL via ORM
- Managed projects end-to-end, from requirements to deployment
- Delivered reliable and maintainable solutions that met client needs and deadlines

EDUCATION

Henry

May 2022 - Sep 2022

Full Stack Developer

Defy Education

Dec 2021 - Mar 2022

Crypto & DeFi Ecosystem 101

Coderhouse

Apr 2021 - Nov 2021

Full Stack Developer

SKILLS

Technical Skills: Rust, Anchor, TypeScript, Solidity, Node.js, React, Next, AWS, Git.
