rappazzini.dev.ar

I have developed a passion for building innovative blockchain solutions that address both technical and real-world challenges. I have several years of experience in Solana with Anchor, applying best development practices, maintaining and optimizing code, and ensuring quality through testing and fuzzing testing. I also have experience in Web3 gaming, and I enjoy working in dynamic, challenging environments that foster personal and professional growth.

EXPERIENCE

Inside Dark Studio, Remote - *Blockchain Developer*

APRIL 2023 - PRESENT

I work collaboratively with the team as a Rust Smart Contract Developer, building solutions for Web3 games as well as DeFi. I also implement testing with TypeScript to ensure the quality and security of the projects.

OPIS EcoWallet, Remote - *Full Stack Blockchain Developer*

OCTOBER 2022 - APRIL 2023

Developed the main web application and integrated it with smart contracts using Hardhat, Next.js, Node.js, and styling libraries. Collaborated closely with the team to successfully launch the MVP to market.

Freelance, Remote - *Full Stack Web Developer*

AUGUST 2021 - AUGUST 2022

Developed a variety of websites—including static sites, dynamic apps, portfolios, and e-commerce—for diverse clients. Mainly used Next.js or React.js with Node.js, styling libraries or Sass, and SQL with ORM for database management.

LANGUAGES / FRAMEWORKS / TOOLS

Rust, Anchor, TypeScript, Node.js, Next, Tailwind, Git.
