

Francisco Rappazzini

Solana Blockchain Developer

LinkedIn | Github | Portfolio | franciscorappazzini@gmail.com

ABOUT ME

I'm a product focused Blockchain Developer specializing in Rust and the Solana ecosystem. I build secure, high performance Solana programs optimized for efficiency and real world adoption. I thrive in fast paced environments, emphasize clean architecture and rigorous testing, and deliver scalable, production ready on-chain systems designed for long term impact.

EXPERIENCE

Solana Blockchain Developer

Freelance

Remote

Oct 2025 - Present

- Designed and deployed custom Solana programs using Rust, Anchor, and Pinocchio for DeFi and token based systems.
- Led projects end-to-end, from architecture design to mainnet deployment.
- Optimized contract performance, compute usage, and account structures for efficiency.
- Conducted testing and security reviews to ensure stable and production-ready releases.

Solana Blockchain Developer

Inside Dark Studio

Remote

Apr 2023 - Oct 2025

- Led the design and delivery of production grade Solana programs for DeFi, RWA, and Web3 gaming products.
- Managed small teams and coordinated on-chain and off-chain integrations.
- Improved reliability through integration and fuzz testing.
- Ensured high standards of security, optimization, and long-term maintainability.

Full Stack Blockchain Developer

OPIS EcoWallet

Remote

Oct 2022 - Apr 2023

- Contributed to the architecture and development of the core web application and smart contract integrations.
- Supported the successful MVP launch within timeline.
- Built scalable full stack solutions using Next.js and Node.js.
- Ensured stable interaction between frontend, backend, and blockchain layers.

Full Stack Web Developer

Freelance

Remote

Aug 2021 - Aug 2022

- Designed and delivered multiple production ready web applications end-to-end.
- Built scalable solutions using React/Next.js and Node.js.
- Translated business requirements into technical implementations.
- Maintained and optimized deployed applications for performance and stability.

EDUCATION

Henry, Argentina

Full Stack Developer

May 2022 - Sep 2022

Defy Education, Argentina

Crypto & DeFi

Dec 2021 - Mar 2022

Coderhouse, Argentina

Full Stack Developer

Apr 2021 - Nov 2021

SKILLS

Skills: Rust, Anchor, Pinocchio, TypeScript, Solidity, Node.js, React, Next, AWS, Git
